Notes to the Condensed Interim Consolidated Financial Statements

For the Six Months Ended June 30, 2021 and 2020

(Unaudited - expressed in Canadian Dollars)

1. Nature of operations and going concern

Organto Foods Inc. ("Organto" or "the Company") is engaged in the sourcing, processing, packaging, distribution and marketing of fresh organic and non-GMO vegetable and fruit products. The Company employs an asset-light business model to provide year-round supply of a number of organic and non-GMO fruit and vegetable products to a growing base of socially responsible and health conscious consumers. The Company's common shares are listed for trading on the TSX Venture Exchange ("TSXV") under the stock symbol "OGO" and on the Frankfurt Stock Exchange under the stock symbol "OGF".

The Company's head office and principal address is located at 1090 Hamilton Street, Vancouver, British Columbia, V6B 2R9, Canada.

In March 2020 the World Health Organization declared coronavirus COVID-19 a global pandemic. Since then million of cases of the disease have been identified around the world, including regions that are important to the Company's business in terms of sales, product supply and other aspects of its supply chain. The Company has continued to operate during the outbreak. Essential food supply chains have been maintained in these difficult times, although not without their issues due to logistics and labor challenges, and the Company has continued to work with its supply partners and customers to bring product to market. As the coronavirus pandemic plays out around the world, the full impact on the Company's business from this is unknown and difficult to predict. An extended pandemic outbreak including the potential of additional waves in many countries already impacted, or dramatic increase in actions taken by Governments to control transmission of the virus could cause the Company's key third party suppliers or the Company itself to temporarily close, which could lead to a shortage of raw materials and finished products. Also, if one or more of the Company's key customers were required to close for an extended period, the Company might not be able to ship products to them. In addition, consumers may decrease their level of purchasing activity, which would also adversely impact the Company's sales. Any of the foregoing events or other unforeseen consequences could materially adversely affect the Company's business, results of operations, financial condition and/or cash flows.

These condensed interim consolidated financial statements have been prepared on a going concern basis which implies that the Company will continue realizing its assets and discharging its liabilities in the normal course of business for the foreseeable future. Should the going concern assumption not continue to be appropriate, further adjustments to the carrying values of assets and liabilities may be required. The operations of the Company have historically been funded by the issue of share capital, bank loans, short-term loans and convertible loans. At June 30, 2021, the Company had working capital of \$1,996,710 (December 31, 2020 - \$2,580,088) and an accumulated deficit of \$30,627,692 (December 31, 2020 - \$28,224,170). Accordingly, the ability of the Company to realize the carrying value of its assets and continue operations as a going concern is dependent upon its ability to obtain additional financing as needed, continued financial support from related parties, and ultimately on generating future profitable operations. The factors described indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

2. Basis of presentation

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). These condensed interim consolidated financial statements have been prepared using the same accounting policies and methods of computation as the most recent annual financial statements for the year ending December 31, 2020.

These condensed interim consolidated financial statements were approved by the Board of Directors and authorized for issue on August 30, 2021.

6. Investment securities

In June 2019 Organto entered into a share purchase agreement to sell its shares of Medicannabis S.A.S. ("Medicannabis") and related intellectual property ("IP") consisting of licenses and seed and cultivar rights to Xebra Brands Ltd. ("Xebra") for a combination of shares of Xebra, cash, forgiveness of debt and a right of first refusal ("ROFR") to distribute Xebra's cannabis products throughout Europe. Xebra is an emerging, privately held Canadian cannabis company developing high-margin cannabis-based consumer products, with a major focus on cannabis-infused beverages.

Under the terms of the agreement, Organto, together with the former shareholders and certain advisers of Medicannabis, received a total of 10,000,000 common shares of Xebra, with Organto receiving 7,124,630 common shares and the former shareholders and advisers of Medicannabis receiving 2,875,370 common shares. The Company received shareholder approval and TSXV acceptance of this transaction in October 2019 and final completion of the transaction occurred in December 2019. Upon receipt of Xebra shares in December 2019, the former shareholders and advisers of Medicannabis returned the 7,461,538 common shares of Organto previously issued as part of the acquisition of Medicannabis in November 2018 and these shares were cancelled.

During the second quarter of 2021 the Company returned 514,625 shares of Xebra to Xebra for proceeds of \$10,292. No gain or loss was realized on this transfer as the proceeds were equal to the carrying value of the shares.

Organto Foods Inc.

Notes to the Condensed Interim Consolidated Financial Statements

For the Six Months Ended June 30, 2021 and 2020

(Unaudited - expressed in Canadian Dollars)

During the second quarter of 2021 the Company sold its ROFR to Xebra for proceeds of 200,000 common shares of Xebra. No value was ever attributed to the ROFR given the uncertainty of when or if Organto could begin profitably distributing Xebra products in Europe. A value of \$0.17 per share was used for the shares received and \$34,000 was recorded as other income in the second quarter.

As they are not publicly traded, the fair value of the Xebra shares is estimated using a combination of the price of the most recent funding involving financing from external investors and expected proceeds for a total carrying value of \$1,157,701 at June 30, 2021 (December 31, 2020 - \$1,040,582).

7. Intangible assets

Intangible assets include the trade name and client relationships acquired when the Company purchased 100% of the outstanding shares of Fresh Organic Choice BV ("Fresh Organic Choice"). Trade names are being amortized over 5 years and customer relationships over 10 years. Their amortization is included in selling, general and administrative expenses on the consolidated statement of comprehensive loss.

In January 2021, the Company purchased 100% of the outstanding shares of Fresh Organic Choice, a privately held Dutch corporation and a provider of a wide range of year-round fresh cut organic herbs, marketed under the Fresh Organic Choice brand and sold throughout Europe. Purchase consideration was made up of the payment of 150,000 euros in cash, the issuance of 839,570 common shares of Organto and an earn-out to the former owner of up to 100,000 euros based on pre-established growth targets to be attained over the next three years. The common shares are subject to escrow provisions and will become freely tradable in equal amounts over the next three years.

The allocation of the purchase price was as follows:

The results of operations of Fresh Organic Choice are included in the consolidated financial statements of the Company from January 15, 2021, that date being the date on which Organto's control of Fresh Organic Choice commenced. The fair value of the earn-out payments was calculated using the present value of the anticipated future payments, discounted at 31% and is recorded in accrued liabilities. Based on the historical performance of Fresh Organic Choice, the earn-out targets are expected to be fully achieved in the first year and the carrying value of the earn-out payments will be accreted over the next year or until fully paid.

Legal costs related to the acquisition of \$17,700 have been charged to professional fees in selling, general and administrative expenses and employee costs of \$27,900 have been charged to labour and benefits in the consolidated statement of comprehensive loss.

The acquisition method of accounting was used to account for the acquisition of Fresh Organic Choice. Under this method, the cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date and the excess of the cost of acquisition over the fair value of identifiable net assets acquired is recorded as goodwill.

8. Short-term loans payable

During the year ended December 31, 2018 the Company received \$647,402 in interest-bearing loans from insiders and certain shareholders. These loans were unsecured and bore interest at rates between 0 and 8%. In 2019 the interest rate was changed to 8% on these loans and in 2020 the interest rate was again changed to 12% on these loans. At December 31, 2020 the balance remaining on these loans totalled \$295,954 and this amount, together with accrued interest, was paid in January 2021.

9. Bank loan

In January 2019, the Company established a revolving credit facility with a Mexican bank for up to US\$500,000. Interest was payable monthly at 12% on any funds borrowed. Borrowed funds were required to be repaid within 180 days after which they could then be re-borrowed. In June 2020 the credit facility was increased to US\$1,000,000. The credit facility was guaranteed by a convertible debenture which could be issued in order to settle the principal amount borrowed. In October 2020, a convertible debenture with a face value of \$677,500 was issued and immediately converted into 13,550,000 common shares to settle US\$500,000 of the credit facility. In November 2020, a convertible debenture with a face value of \$677,500 was issued and immediately converted into 13,550,000 common shares to settle the remaining US\$500,000 of the credit facility.

In December 2020, a new revolving credit facility with a term of 2 years was established with the same bank for US\$750,000 and the full amount was drawn. Interest is payable monthly at 8% annually. This credit facility is guaranteed by a convertible debenture which may be issued at the Company's option in order to settle the principal amount borrowed. Costs incurred to issue the loan and associated security have been deducted from proceeds and will be amortized during the two year life of the loan. A total of 3,210,500 common shares can be issued under the security in order to settle the principal amount borrowed.

A continuity of the balance is shown as follows:

10. CEBA loan

The Company received proceeds of \$40,000 in September 2020 and an additional \$20,000 in December 2020 under the Canada Emergency Business Account (“CEBA”) program. The loan is a 0% interest bearing loan with no principal payments required. The loan can be repaid at any time and \$20,000 of the loan will be forgiven if repaid in full before December 31, 2022. If not repaid by December 31, 2022, the loan can be converted into a 3-year term loan at 5% annual interest paid monthly effective January 1, 2023.

11. Convertible debentures

May 2022 series

In May 2020 the Company completed a private placement of convertible debentures with a total face value of \$720,300. on market conditions. Option pricing methods require the input of highly subjective assumptions including expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options granted and/or vested during the period. The fair value of the options granted in 2021 was calculated using the Black-Scholes Option Pricing Model with the following inputs: expected price volatility of 117-120%, risk free interest rates of 0.33%-0.80%, expected lives of 5 years and no dividend yield.

The fair value of the options granted during the six months ended June 30, 2021 was \$324,800 (2020 - nil). The Company recorded \$149,565 in the three months June 30, 2021 (2020 - \$65,241) and \$358,106 (2020 - \$129,005) in the six months ended June 30, 2021 as stock-based compensation expense relating to options that vested.

(c) Restricted share units

In January 2021 the Company adopted a restricted share unit ("RSU") plan to issue RSUs whereby the total aggregate RSUs and share options outstanding may be up to 10% of its issued capital at the time of an applicable option grant. Under the RSU plan, the Company has 2,500,000 RSUs reserved for issuance and the Company's Board of Directors may from time to time, grant RSUs to directors, officers, employees or consultants. The vesting terms of an RSU are at the discretion of the Board of Directors.

In January 2021 the Company granted 1,375,000 RSUs with 25% vesting immediately and 25% every six months thereafter. The fair value of each RSU is determined using the closing price of the common shares of the Company on the date of grant.

The Company recorded \$159,216 in the three months June 30, 2021 (2020 - nil) and \$247,372 (2020 - nil) in the six months ended June 30, 2021 as stock-based compensation expense relating to RSUs that vested.

At June 30, 2021 a total of 1,375,000 RSUs were outstanding, of which 343,750 had vested.

(d) Warrants

In January 2021, the Company issued 62,000 warrants in connection with the convertible debentures issued in January 2021 (note 11). These warrants are exercisable for a period of two years at an exercise price of \$0.30 per share. The fair value of these warrants of \$8,800 was calculated using the Black-Scholes Option Pricing Model with the following inputs: expected price volatility of 125%, risk free interest rate of 0.21%, expected life of 2 years and no dividend yield. The value of these warrants was included with the issue costs for the debentures issued in December 2020. These costs were recorded in 2020 as an offset to the convertible debenture balances and will be amortized over their expected two year terms.

Warrants outstanding and exercisable at June 30, 2021 as follows:
