Organto Foods Inc. Expands Scalable and Flexible Logistics Platform to Support 2026 Growth

Logistics and infrastructure platform positioned to scale with increased commercial growth

Vancouver, British Columbia, Canada, and Breda, the Netherlands – February 11, 2026 – Organto Foods Incorporated (TSX-V: OGO, OTCQX: OGOFF, FSE: OGF0) ("Organto" or the "Company") announces that it has strategically expanded its scalable, flexible, and capital-efficient operations and logistics platform in order to support the expected significant commercial growth forecast for 2026 and to underpin its growth objectives for 2026 and beyond.

Over recent months, Organto has proactively expanded and diversified its global logistics capabilities, ensuring the Company is ready to service increased volumes from both existing customers and newly awarded retail programs. This platform is designed to be capital-efficient, highly flexible, and cost-optimized, allowing Organto to adapt quickly to changes in volume, routing, and market conditions as sales growth accelerates.

As part of this operational readiness, Organto has contracted with four new sea freight carriers to significantly expand its base of active carrier relationships, including several global shipping leaders. This expanded carrier base will enhance capacity, routing flexibility, and scheduling reliability, optimizing Organto's product handling. The Company has also expanded its sourcing and export capabilities with the addition of two new ports of origin in Ecuador and Guatemala — improving product handling and efficiency across key growing regions.

Organto has also added three new destination ports located in Germany, Spain and France — strengthening access to core European markets and improving downstream logistics performance.

"These operational and logistics capabilities are now firmly in place and ready to support our 2026 growth," said Alexander Widmann, VP Operations, the New Fruit Group, a wholly-owned operating subsidiary of Organto Foods Inc. "By building a diversified, flexible, and capital-efficient logistics platform ahead of forecast sales growth, we believe we are well positioned to optimize costs, improve service levels, and scale efficiently as new retail programs ramp up."

The Company expects that this infrastructure and logistics framework will support improved cost control, enhanced execution reliability, and increased resilience across the supply chain as sales

volumes continue to grow in 2026. With strong sales growth projected, an expanded grower network, and a scalable and flexible operations and logistics platform now established, Organto enters 2026 well positioned to execute on its growth plans and to deliver long-term value to shareholders and commercial partners alike.

Forward Looking Statements

This news release may include certain forward-looking information and statements, as defined by law including without limitation Canadian securities laws and the "safe harbor" provisions of the US Private Securities Litigation Reform Act of 1995 ("forward-looking statements"). In particular, and without limitation, this news release contains forward-looking statements respecting Organto's business model and markets; Organto's belief that its platform is designed to be capital efficient, highly flexible and cost optimized, allowing it to adapt quickly to changes in volume, routing, and market conditions as growth accelerates; Organto's belief that adding four new sea carriers, two new ports of origin, and 3 new ports of destination will enhance its operating and logistics platform to enable efficient execution as the Company continues to accelerate its aggressive growth plans; Organto's belief that its operational and logistics capabilities are now firmly in place and ready to support 2026 growth; Organto's belief that the Company is well positioned to optimize costs, improve service levels and scale efficiently as new retail programs ramp up; Organto's belief that it is well positioned to execute on growth plans and to deliver long-term value to shareholders and commercial retail partners alike; and general business and economic conditions. Forward-looking statements are based on a number of assumptions that may prove to be incorrect, including without limitation assumptions about the following: the ability and time frame within which Organto's business

model will be implemented and product supply will be increased; cost increases; dependence on suppliers, partners, and contractual counter-parties; changes in the business or prospects of Organto; unforeseen circumstances; risks associated with the organic produce business generally, including inclement weather, unfavorable growing conditions, low crop yields, variations in crop quality, spoilage, import and export laws, and similar risks; transportation costs and risks; general business and economic conditions; and ongoing relations with distributors, customers, employees, suppliers, consultants, contractors, and partners. The foregoing list is not exhaustive and Organto undertakes no obligation to update any of the foregoing except as required by law.
